# Code Peak

# 2023

Code Peak is a month-long programme conducted by Coding Club IIT Guwahati and NJACK IIT Patna that helps students understand the paradigm of Open Source contribution and gives them real-world software development experience. The event targets first-timers who wish to participate in Free and Open Source(FOSS) Contributions and the experienced developers who want to show their skills by contributing to real-world projects.

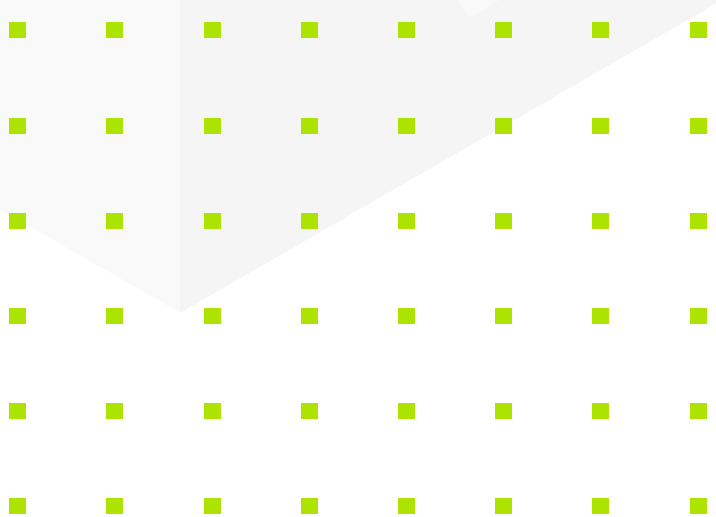

The programme follows a mentor-mentee format where we select mentors who bring their own projects to which the participants can contribute keeping the spirit of Open Source in mind. The main aim of the entire event is to lay a foundational base and promote the culture of Open Source in India and prepare them for potentially larger Open Source Events at a global level.

# Fastest Growing **Winter** Of Code

The 2022 edition of Codepeak was a huge success receiving participation from across the country. Many project maintainers from different colleges and organizations stepped in for projects and mentored participants. More than 2000 participants took part and over 2500 Pull Requests were made out of which 1500 were successfully merged. Along with this many live events were also conducted.

In the 2023 edition, we aim to take the event to greater heights with the combined efforts of IIT Guwahati and IIT Patna, by reaching an unprecedented number of students with a varied diversity in projects and promoting the spirit of development and Open Source to college students all over the nation.

# Event

# Structure

## Talks

Specialists from numerous fields present their insights about programming with contributors. Individuals get to recognize many inspiring tales from these specialists. also, members have the opportunity to interact and make clear their doubts on programming from the well-known personalities inside the area of programming.

## GIT & GITHUB Workshops

Code Peak brings to you the "Advanced Git and GitHub Workshop" right from basics like installation and pushing-pulling to advanced tools like Branching, also included is a bonus section on the cool perks of GitHub! To give you some hands-on experience, we have tasks designed to get you the feel of how Open Source Events work.

# Why Sponsor

# CodePeak

## Brand Awareness

Continuous promotion through the social media handles of Coding Club IIT Guwahati and NJACK IIT Patna, throughout the WOC event.

Opportunity to present your brand to a large audience and by also putting forward your business front and center to a diverse group!

## Low-Cost Marketing

Get recognized by the cream of the development community, and make yourself visible by picking one of our sponsorship plans at a fraction of your marketing budget.

## Talent Acquisition

CodePeak is not just a coding event, but also a hub of talented individuals enthusiastic about coding and development. By sponsoring CodePeak, you get direct access to this pool of talent. You can identify promising individuals for internships or even full-time positions, thus reducing your recruitment costs and time.

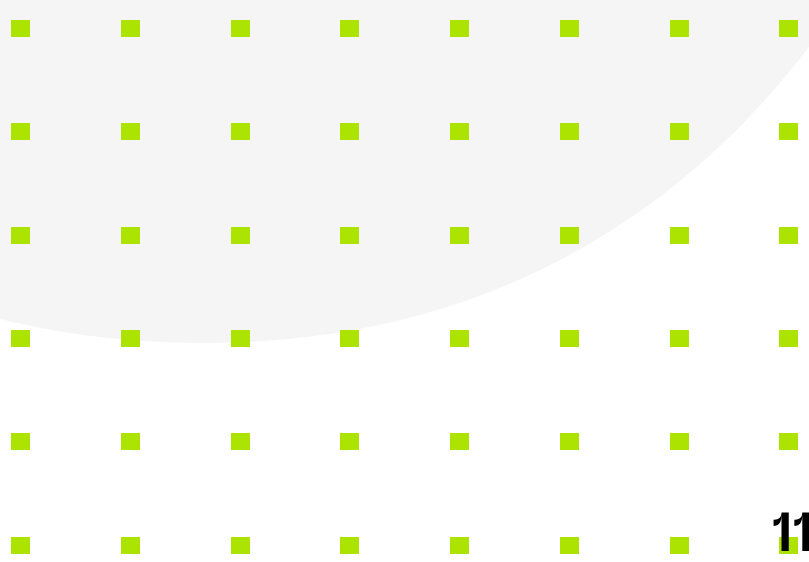

# Why Sponsor CodePeak

## Flexibility

You also have the opportunity to get tailor-made benefits that go well with your needs with us.

## Contributing To A Cause

Code Peak is aimed at helping people take their first steps into Open Source and Development. Your sponsorship will directly go into making this event more accessible and would welcome a very large community.

# On Part

We are excited about the possibility of partnering with you to achieve new heights. Your support will not only help us reward our participants with more opportunities and valuable prizes, but also enrich our "Talks" series. We are particularly interested in inviting speakers who can share insights of their experience to our curious audience.

We believe that your association with us can contribute to a greater good and lay the foundation for future collaborations. While we understand that none of these terms are compulsory, we are committed to building a relationship that goes beyond financial terms.

We hope that you will consider this proposal and look forward to discussing it further. Please let us know a convenient time to discuss this opportunity.
